Abstract (Basic): JP 2116543 A

The reflection preventive film comprises at least one layer of high refractive index coating layer of which main component is high refractive index metal cpd., pref., oxide, alkoxide, or polymer of alkoxide, and at least one layer of low refractive index coating layer of which main component is ultra-fine particles of low refractive index metal cpd. and organic silicone cpd.

USE - For reflection preventive film formed on the surface of lenses. (6pp Dwg.No.0/0)
